Dear School Administrator,

We have some exciting news! We have launched a **FREE math fact assessment tool** called Space Challenge! You can learn more about it here - <https://mathfactsmatter.com/space-challenge/>

Teachers can register and generate a teacher code to receive **FREE teacher reports** with more detailed information about their student's performance on the assessment.

Every score is shown in our Hall of Galactic Champions. Using the powerful search filter, you can see scores by a specific school, teacher code, grade level, and more!

You can see how your students perform by registering your school in our system for free. All registered schools are automatically entered into our national competitions.

To register your school, follow the 3 easy steps below:

1. Go to [mathfactsmatter.com](https://mathfactsmatter.com) and sign up for a free account.
2. From the user Dashboard, click on School Administrators then on Add a School in the teal sidebar on the right or go to this URL <https://mathfactsmatter.com/dashboard/my-schools/edit-a-school/> after you have logged in.
3. Enter in your school's information, then click Save. After your school is saved in our system, it will appear on your Dashboard with the Link Key that was generated for your school.

Give your teachers the Link Key and instruct them to register at [mathfactsmatter.com](https://mathfactsmatter.com) or sign in if they already have an account.

If you have questions you can read our FAQs at <https://mathfactsmatter.com/solutions/frequently-asked-questions/> or you can give us a call at (833) GO-FACTS.

We hope you enjoy the Space Challenge!

Sincerely,

Kathy Robinson  
President and CEO of Schoolware Inc. and Math Facts Matter
